COMMERCIAL.

FRIDAY, DECEMBER 7, 1877. Again we go to press with no arrivals from the coast to enliven us with commercial, political, or warlike news of the great world without; nevertheless, we lve, and move in our usual quiet way, the only change notice ble since our last be ing in the weather. During the week we have had a little share of decidedly winter weather, and excepting any damage done by the high north wind, -the relief from the monotony of the "trades" that has been experienced for months past has been agreeable. We regret, however, to learn that considerable cane has been blown down and injured on the weather side of this island, and the same may perhaps have been experienced in other exposed districts of the islands.

The stmr Zealandia came to hand Tuesday evening last from the Colonies, and sailed promptly Wednesday noon for San Francisco with a large passenger list as usual, and quite a freight list, amounting to \$71,943 in value.

The bk Amy Turner sailed yesterday for New Bedford with a large cargo of domestic produce, valued at no less than \$67,-160, and transhipped freight of \$39,273 value.

The schr Minnehaha has had her name changed to the Waioli, and has initiated herself into the hardships of our coasting trade by a trip to Laupahoehoe, with material for the new plantation in that part of Hawaii.

The schr Energy's name has been changed to Haunanibeautiful snow. She is taking in cargo for the advancing agricultural district of Kau, for which she will be a regular packet. The wh bk Mercury has been lying off and on the port since Wednesday, awaiting the shipment of men. She refitted at Hilo, and proceeds to-day on a cruise to the eastward, expecting to touch here again in the spring. The wh bk Hunter has sailed to cruise. Schr C M Ward has hauled in to the wharf and is being fitted for the whaling service under command of Cant Beni Whitney

The stmr City of New York will be due here next Thursday from San Francisco; we also consider the schr Nirados and brig W H Meyer as fully due Our next departure for the coast will be the D C Murray, about the latter part of next week. The bk H W Almy is also

The St. Andrew's Celebration.

The Festival of St. Andrew, Nov. 30, was observed in a very hearty manner at St. Andrew's Temporary Cathedral. The services were all held in the Hawaiian language. The Holy Communion was celebrated by his Lordship the Bishop of Honolulu at 6.30 A. M. At 10.30 A. M. Matins was sung, and several adults were baptized, receiving afterwards the Rite of Confirmation from the hands of the At 3. P. M. Evensong was sung. The Bishop preached a sermon in which he pleaded for help to build the Cathedral, and exhorted the brethren to enter into this work, with all their a memorial of their beloved Liholiho and that it against the danger of allowing this glaring evil see that a noble structure should rise from that | strous to witness in this peaceable community foundation which was already laid.

The following day the Bishop and Miss Willis of the Hawaiian women is in question. entertained the Hawaiian Congregation at the house of the Bishop. The feast was in the form of a Native Luau. About 200 were present, and enjoyed themselves exceedingly. The day was rather unpropetius, yet the young people contrived to amuse themselves with a few out-door sports, such as Croquet, Quoits and racing. Her Majesty Queen Emma graced the feast with her presence and did much towards the entertainment of the guests.

Before concluding these remarks, we think that this business of the Chinese being allowed to crowd into these Islands without female mates or wives, about which so much has been THE INCOURSE here of Chinese laborers of the said and written in the course of this present male sex alone, is daily assuming more alarming year, naturally suggests the enquiry: who is the proportions, well calculated to create the liveliest responsible head of this government? a question apprehensions for the future consequences of upon which we made some comments in a former this immoral condition of our society. We have issue. To us it seems that this is a sort of acephalready alluded to this subject in preceding issues alous government, as we then remarked-a govof this journal, and we again feel it our imperaernment without a head. In all Royal Cabinets tive duty to call the attention of government to one of the Ministers is Prime Minister, or Prethe immediate necessity of putting some barrier mier. Here we have no Premier. We regret to be obliged to endorse States governments conjointly-is a matter that regards the distant future rather than the prethis opinion. There is really no excuse for this sent time. This would be a great mistake. If the proposal is adopted by both governmentsa very likely matter,-the cable will be laid down without loss of time, and before the end of 1878 we may enjoy the inestimable boon of telegraphic communication with the outer world. We await with the liveliest anxiety further information concerning this highly important proposal. There may be some very urgent political motives for the undertaking on the part of the British government. Telegraphic communication with British India via Australia would be secured by this new line; whereas at present, the British government is depending for its teleyoung Chinamen are not to blame for coming here, to seek their fortune, as the saying is; and graphic communications with the British-Indian some Chinamen in this community are unex- | Empire on overland lines and submarine cables ceptionable, even professing christianity. over which it has no control; and, in case of Hence we solemnly warn the head of this gov- war with a foreign power, such as Russia, it ernment,-but, indeed, we now recall that this would be an easy matter to cut off India from government has no head, about which more telegraphic communication altogether with Engheart. partially excused owing to their want of undercable line, we will thus be placed in immediate standing of the sublime virtue of christian morcommunication with those groups. At present the Fijis have steam communication monthly It may be urged: What are the planters to with Sydney. Now, if we are going to have do without Chinese labor? In reply, we can telegraphic communication with those two only repeat what we have already remarked on groups, it certainly appears reasonable to endeayour to secure steam communication with them this question, namely, that it is the duty of the planters to assist the government in seeking a likewise. We might thus get up a second remedy for the present dangerous condition of monthly communication with Australia, as a the Chinese population, by importing some shipcontinuation of our new bi-monthly steam service oads of women from China, or other countries between this port and San Francisco. In this way, we could send on a second monthly mail where they are superabundant, and henceforward engaging only married Chinamen on their planfrom Europe and the States via the Pacific to the tations: which must necessarily occur if the Colonies. Besides, we would give our Samoa cousins a monthly mail service placing them in contact with the rest of the world. Perhaps they might be induced to join in the Confederation scheme to which we alluded recently, if they were brought within steam communication with ourselves. Some time ago, we thought we were going to lose our steam line completely,one steamer passed us by, as a beginning; we then apprehended a total break off of our monthly steam communication with the colonies and the States. Now, instead, we are going to have a bi-monthly steam line between Honolulu and San Francisco. At the same time the pleasant news reaches us that some very kind people are seriously talking of giving us cable communication gratis with both the States and the Colonies. We are indeed lucky to be just where we are on this planet, and not at the North or South Pole-out in the cold! To still further improve the advantages of our position, a little diplomacy might get us a steam line via Samoa to the Fijis. If an enterprising company or firm here-some of our merchant princes-laid down a steamer on the line proposed, we think that the owners might readily obtain a mail subsidy from the British government of the Fijis, also from the British Australian governments. The British Home government and the government of the United States would also have decided interest in aiding the scheme. In fine, our own government, and even the government

of Samoa, might add a little help. Altogether,

there seems to be just a plan of getting up a bi-

monthly service between San Francisco and

Sydney, in the way we indicate, via Honolulu,

Samoa and Fiji, on three separate lines of steam-

ers, which might all three run in connection.

Perhaps the P. M. S. Co., would not exactly like

such a scheme; but really, we do not think that

it would be found to hurt the interest of that

company at all. Possibly Sir Arthur Gordon

may see the advantage of this proposed line for

to moot the matter incidentally with the govern-

ment of Sir Arthur, who, we think, would be

approval, and lend most important aid in the

furtherance of the business. It will remain for

King Kalakaua to initiate negotiations with the

Samoa government on the confederation scheme

-after steam and cable communication is estab-

stations like ourselves, in this new Pacific Ocean

lished between the two groups of "cousins." OUR CENTENNIAL -We fully endorse all that has been said and written on the subject of a centennial celebration of the discovery of these Islands by Captain Cook, (which subject was first broached in these columns upwards of three years ago) We think that the best plan would be for all those in hold a public meeting, announced by advertisement, at the Hawaiian Hotel, to be presided over by His Excellency the Governor of Outn. The matter could be discussed, and a line of action agreed upon. There is no time to be lost.
